

# Sales Tall

With House Bills "Sales Tax" and  
State Tax measures have colosed public confidence  
partially in a greater extension, adding other proprietary medications.

It should however, it possesses great  
merit and produces greater value than  
any other. It is not worth the ex-  
pense. House's new measure does, that  
the story. All proprietaries of the  
proprietary like Hood's dermatitis  
will be honest. We have more  
confidence and this with its sus-  
picious merit, is why the people are  
holding confidence in it, and buy

# Hood's Sarsaparilla

Almost to the satisfaction of all others. Try it.  
Prepared only by C. L. Hood & Co., Lowell, Mass.

are the only pills to take  
Hood's Pill and their disappearance.

per Month  
Single copy 10 Cents.

## OFFICIAL PAPER OF GRANT COUNTY.

FRIDAY, OCTOBER 10, 1897

Albuquerque is to have a beet sugar  
factory.

The people of Santa Fe had their first  
snow fall last Monday morning.

Horse thieves are abroad in the Rio  
Grande valley about Las Cruces.

The wool clip of New Mexico for 1897  
is estimated by dealers at 8,000,000 lbs.

Twenty thousand sheep were driven to  
Santa Fe from southwest New Mexico a  
few days ago, for shipment over the San-  
ta Fe line to Omaha, Nebraska.

The little 74-year old son of Mrs. H.  
Potter, of the Viola company, was  
downed in Mesa reservoir at Albuquerque,  
on last Saturday afternoon.

A pitiful paragraph from the Rainier Re-  
porter: "The Currency Commission  
might be properly called a Committee  
to aid in juggling the silver market."

The fishing sportsmen of Eddy, on the  
Pecos river, have received from Washington  
a consignment of fish for stocking  
the waters of south-east New Mexico.

Twenty-two car loads of cotton seed  
oil were shipped from Sherman, Texas  
a few days ago, for Europe. There were  
one-thousand barrels of oil in the ship-  
ment.

The European wheat crop for this year  
is short two hundred million bushels, so  
an American wheat is going up, notwithstanding  
McKinley's election and his  
protective tariff.

Speaking of health resorts in New  
Mexico—come down to Deming if you  
wish to breathe pure air and drink the  
purest water and plenty of it and live  
long and happy.

One hundred thousand lambs have been  
marketed in Rio Arriba county this year,  
bringing to the sheep ranches of that country  
one hundred thousand dollars—cash.  
There is money in sheep.

Nine thousand head of New Mexican  
sheep were recently sold in a bunch at  
Kansas City to feeders, and another lot of  
three thousand was sold about the same  
time to Greeley (Colo.) packers.

Weyler, the Spanish butcher, will pass  
out of Cuba and current history in a few  
days. Even Spain's finger of scorn  
will point him out as one who resorted to  
inhuman strictures and failed.

A telegram says the police of a Chiapas  
go suburban town have been ordered to  
shoot the "scorcher" system on the  
streets. That would be a radical remedy,  
but then, the "scorcher" is a radical  
outrance on a city thoroughfare.

The five stock raisers of this county  
never had a more profitable season  
than they are enjoying this year. Their  
cattle and sheep are in fine condition and  
the advanced price have made them  
happy and contented. Baton Rouge.

A dispatch from Kansas City says seven  
Santa Fe passenger conductors were  
discharged last Saturday for permitting  
people to ride on their trains without  
paying fare. Some of these conductors  
had been with the Company twenty  
years.

The Las Vegas Optic says the dogs of  
that city make no complaint at being  
muzzled as a preventive of dog bites, but  
that their owners do. Better muzzle  
a few of the offending dog owners as a  
preventive against lesions.

The telegraphic announcement is made  
that the largest liquor counterfeiting  
scheme ever known was unearthened in  
Tulsa—the other day—that the liquor  
dealers of the country have lost six hun-  
dred thousand dollars by the counterfeiters,  
but were unable to locate it.

The New Mexican says that from  
twenty acres of ground in apples, this  
year, Ed Miller of Taos, will have  
sixty-seven carloads of apples to ship.  
How is that for apples around Santa Fe?  
And what is more, Mr. Miller's apples  
grow as big as can be grown on God's  
green earth.

The people of Connecticut are soon to  
see an improved Constitution amendment

which regarding state power to be able  
to end the creation of the United  
States Government intended to end a  
good scheme. Every man should be  
free to read for himself the laws of his  
country and act as he sees fit, and not  
man's word as to what those laws require  
of him.

The Santa Fe New Mexican is agitating  
the project of erecting a beet sugar fac-  
tory in that city. Now that the suc-  
cessful cultivation of the sugar beet in New  
Mexico has been demonstrated, there  
seems no good reason for not great  
activity in the establishment of such factories at  
several points in the Territory.

The St. Louis Globe Democrat is attri-  
buted to the credit of discovering the first  
single-standard burglar, who burglarized  
the Standard house and declined to take  
any silver. But, suggests the El Paso  
Times, in making this announcement,  
the Gadsden Democrat shuns its eyes to the  
single standard robbers who spent \$10,  
000 last year to rob the people.

The El Paso Journal notes an increased  
demand for calves and stock cattle,  
and predicts therein the conclusion  
that the herds will increase in number  
and size for a few years to come at least.—  
The same thing is invariable true there-  
out that portion of the west that has been  
devoted to the production of fine  
stock cattle.

Under the heading, "Push or Let Go,"  
a California paper says: "Those who  
desire to grow up with a town and prosper  
with its prosperity shouldn't sit idly by  
and wait for the town to push and more  
influential people to push them along.  
Get in and boost. If you can't budge,  
don't hang back and hamper others. If  
you haven't enough strength to shove  
to number up enough to let go."

The San Marcial Bee is informed that  
although wool and mutton are bringing  
double the price of last year, sheep shear-  
ers' wages were run in Valencia and So-  
corro counties. The rate last year was  
\$2.50 for shearing one hundred sheep;  
this year that number was sheared for  
\$2.40. The "owners" argument was that  
there are more men to do the work, and  
fewer sheep to shear than formerly.

One feature of the new tariff law, one  
that goes a long way to offset the defi-  
ciencies in other respects, is the section  
imposing full duties on all the personal  
effects of returning travelers purchased  
abroad exceeding \$100 in value. If  
travelers have money enough to buy fine  
clothes and bribe-a-bean in foreign parts,  
they are verily able to pay duties on  
the same. The revenue from this source  
is running from \$2,000 to \$12,000 on each  
incoming steamer on the trans-Atlantic  
lines.

It seems just now to be current opin-  
ion that few if any more appointments for  
New Mexico, especially for the Judg-  
ships, will be made till some time in De-  
cember, after the meeting of Congress, and  
possibly not till January, as few men  
would care to take appointments now,  
especially to important positions, with  
the hazard of holding but a few weeks  
from failure of confirmation by the Senate,  
which meets December 6. It is not  
unlikely that the President takes the  
same view of the matter.

We had quite a respectable cold wave  
down here to southern New Mexico on  
Wednesday, but it was a breath from  
"Araby, the blist," compared to what  
they have up north. In Nebraska it  
was a furious hurricane of snow and ice.  
At Denver and Cripple creek high winds  
in streaks like the waters of a ty-  
phoon. Wires were blown down, side-  
walks were impossible due to drifting  
snow and the canyons filled with it.  
Considerable damage was the result.

"I wouldn't want to hurt any of the  
honorable gentlemen who compose the  
so-called monetary commission, which is  
trying to save the country by reforming  
our financial system, but if a small chunk  
of dynamite was exploded in their vicinity,  
so as to scare them off from further  
effort in that line, I'd be well pleased.

This commission is doing a work not  
only of usurpation, but of positive  
injury to the country. Practically it  
tends to nullify the labors of Senator  
Webster and his colleagues in Europe,  
who are seeking to gain recognition for  
silver.

"I am afraid enough in the cause of the  
metallism to believe in going it alone if  
we cannot get the co-operation of Eng-  
land and the rest. Indeed, we ought  
not to wait for them, because the United  
States is strong enough to force inter-  
national blackmailers. Look at the vast  
amount of silver that is daily being shipped  
to London. The mass of readers do  
not keep track of it, but nearly every day  
hundreds of thousands of ounces of the  
white metal are exported from New York.

The chance is that London gets it  
for 50 cents an ounce, and in return re-  
ceives \$1 for the same quantity in the  
eastern countries, where it is still the  
money of the people. Why should England  
have a claim to "doing something  
for silver" when it is to her interest to  
bear the market in which she is a buyer?

The British are not built that way, and as  
long as we stand for it they will continue

to enrich themselves at our expense."

Now's This!

We offer One Hundred Dollars Reward  
for any case of cataract that cannot be  
cured by Hall's cataract cure.

FRANCIS J. DECKER & CO., Toledo, O.

We, the undersigned, know F. J.  
Candy for the last 15 years, and believe  
him perfectly honorable in all business  
transactions and trustworthy with respect  
to his obligations made by him.

West & Truax, Wholesale Druggists,  
Toledo, O.; Walbridge, Elam & Avery,  
Wholesale Druggists, Toledo, O.

Hall's cataract cure is taken internally

and acting directly upon the blood and  
various surfaces of the system. Testimony  
shows it to be a safe and effective  
remedy.

Hall's Family Pills are the best.

Are You Going East?

Avail yourself of the low rates over

the Southern Pacific. Close connec-

tions, quick time and splendid service

to all points.

The Arch-  
Duchess of Aus-  
tria, it is said,  
can hold a grown  
man in air with  
one hand. Wo-  
men generally do not  
care to be athletic to  
such a degree, but most  
women desire physi-  
cal strength, power  
and energy.

Too thin women and  
overweight women are  
both "out of condition,"

they both lack  
the best sort of physi-  
cal development.

If their digestive and  
secretive functions  
were perfect, the thin  
woman would gain flesh; if the stout one  
lost weight. This is why Dr. Hall's is a  
Golden Standard. Diseases are built up  
strength in both stout and thin people.

It impowers the blood vessels

to supply fresh red, highly vitalized blood

which builds up solid, healthy flesh to

the normal standard, but above that point

reduces and carries away flabby fat. It  
brings you into "condition," imparts  
force, tone and stamina; rounds out  
your wrinkles, fills out your cheeks and  
sparkle in the eyes. Its corrective  
properties far exceed those of any meat  
extract or oily "emulsion."

The Physician's Common Sense Medical Ad-

visee is the most popular medical work in

the English language. It contains a thin

and simple text.

It is a great store of valuable information

and is a copy of the

Physician's Common Sense Medical Ad-

visee.
